HS: Headset Profile. Does not support Voice Control.

HF: Handsfree. The handsfree profile is a much richer profile, supporting more features. Voice control possible using internal phone book or optionally phone's voice control features. The Support Menu allows the user to automatically synchronize his whole phonebook to the Vocalize system.

Note 1 : For these phones, you can use a third Bluetooth device such as a computer, PDA, or another phone to send contacts to the system. Then, you will be able to place a call using voice recognition with the Vocalize system.

Note 2 : After receiving a contact, the system will ask the user to train the name of this contact, and after, is still ready to receive a new one.

Some phones (Sony Ericsson and Samsung Exxx) require a special SSE firmware version to be installed on the Vocalize system. Please request before ordering.
